

BOOT CAMP for Penetration testing

## **A One Day Workshop on “BOOT CAMP for Penetration testing”**

**The workshop conducted by Computer Science  
department on 04-08-2018**

**In VPS college of Arts, Science and Commerce-Lonavala.  
B.B.A.(Comp.Application) & B.Sc.(Comp.Sci.).**

## **Detail Report of Workshop:**

### **Title: Workshop on Boot camp for penetration Testing:-**

The Department of Computer Science, VPS college of Arts, Science and Commerce-Lonavala. B.B.A.(Comp.Application) & B.Sc.(Comp.Sci.). Organized “Two days Workshop on “**Boot camp for penetration testing**” during 04-08-2018.

**Resource person:** Boot camp learning academy

### **About workshop:**

In this 1-day boot camp, you have learned everything there is to know about penetration testing, from the use of network reconnaissance tools to the writing of custom zero-day buffer overflow exploits. The goal of workshop is to help you master a repeatable, documentable penetration testing methodology that can be used in an ethical penetration testing or hacking situation.

This penetration testing training course has a significant return on investment: you walk out the door with hacking skills that are highly in demand.

Testing methodologies-

- Security testing methodologies
- The ethical hacking profession
- Planning and scoping an engagement
- Legal and compliance consideration
- Abusing DNS
- Security testing methodologies

**How many students have attended this workshop:45**

**Conclusion:** A penetration test report provides a detailed and comprehensive analysis of the system's vulnerabilities. It will also detail how to mitigate those issues, including recommendations for patching, hardening or locking down specific systems where needed.
