R Programming

R-software for Probability in Statistics

Total Hours: 32

- We believe that many foundational ideas of Probability and Statistics are best understood when their natural connection is emphasised. We feel that the interested student should learn the mathematical rigour of Probability through **R- software**, the motivating examples and techniques from Statistics, and an instructive technology to perform computations relating to both in an inclusive manner. These formed our main motivations for introducing the course.

Prerequisite:

Mathematics background up to class 12 is needed. Some minor statistics study is desirable.

- Basic Concepts
- Sampling and Repeated Trials
- Discrete Random Variables
- Summarizing Discrete Random Variables
- Continuous Probabilities and Random Variables
- Summarising Continuous Random Variables
- Sampling and Descriptive Statistics
- Sampling Distributions
- Estimation and Hypothesis Testing
- Linear Regression
